

Shiba Lite **WHITE PAPER**

www.shiblite.org

Introduction

Welcome to the Shiba Lite Project, a revolutionary undertaking that brings together a robust group of meme token enthusiasts sharpening the edge of crypto utility. Our major contribution to the crypto ecosystem is a versatile, agile, community-driven meme token available on both the Ethereum and Binance Smart Chain (BSC) networks. The name “Shiba Lite” reflects our inspiration by the viral meme culture and our commitment to lightening up the crypto environment with engaging, user-oriented content and services.

Project Overview

The Shiba Lite project robustly integrates multiple utilities in a single offering, thereby providing an unmatched level of flexibility and diversity within the crypto network. Our four main utilities make it possible for community members to benefit from an enhanced staking system, a dedicated NFT marketplace, a competitive PTE game, comprehensive cross-chain swaps, and an expansive launchpad.

ETH and BSC Chains

In our pursuit of decentralization and inclusiveness, we have deployed Shiba Lite on both the Ethereum and Binance Smart Chain networks. We opted for these networks due to their wide usage, superior security, and remarkable transaction speed.

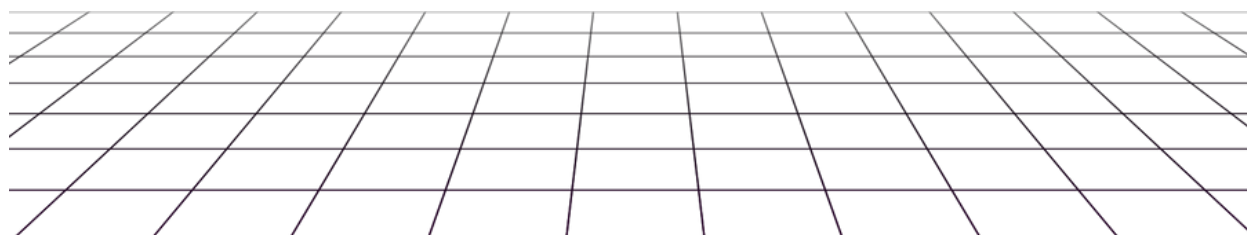

On the Ethereum network, Shiba Lite boasts of a transaction fee-free (0% TXN) structure, catering to users who prefer cost-effective solutions. On the other hand, on the Binance Smart Chain, we have incorporated a 7% per transaction fee. This fee structure includes a unique reward mechanism structured as follows:

3% Reflection: We reward holders with a 3% fee per transaction, which is automatically distributed to all Shiba Lite holders proportionately, rewarding users for their support and commitment to our token.

2% Liquidity: This goes directly to our liquidity pool, ensuring stability and resilience against major price fluctuations.

1% Burn: This allocation is dedicated to burning tokens, contributing to a deflationary effect and potentially increasing the value of existing tokens over time.

1% Marketing/Development Wallet: This fee services the necessary marketing and development activities that ensure the continuous evolution, growth, and visibility of Shiba Lite.

Shiba Lite NFT Marketplace

As part of our mission to democratize the digital art industry, Shiba Lite is in the process of developing an NFT marketplace. The marketplace will allow for minting, selling, purchasing, and holding NFTs, making it remarkably easy for artists and collectors to connect and transact.

Shiba Lite Runner (PTE Game)

Fully aware of the gaming world's boundless opportunities, Shiba Lite plans to launch a PTE game called "Shiba Lite Runner". This game will be engineered to entertain, engage, and offer exclusive rewards to our engaged community.

Shiba Lite Cross-Chain Swaps

Recognizing the need for inter-operability in the crypto acquisitions, Shiba Lite is preparing a feature for cross-chain swaps. Our community members will be able to swap between the Ethereum and BSC versions of our token and other tokens, thereby fusing accessibility with flexibility.

Shiba Lite Swap (DEX & Staking)

To reward our community members, we will introduce a sophisticated staking mechanism and DEX known as “Shiba Lite Swap”. This platform will allow users to swap tokens, stake their assets and earn rewards over time.

LiteLaunch (Launchpad)

To further boost the project’s ethos of inclusiveness and progress, Shiba Lite is popping up a platform named “LiteLaunch”. This launchpad will allow new NFT projects to get a headstart in the crypto space, with the support and backing of the Shiba Lite community.

Conclusion

The Shiba Lite project enthusiastically seeks to redefine the boundaries of crypto utility through our pioneering multi-chain meme token. By incorporating elements of community participation, gaming entertainment, and innovative features, we aspire to create a meaningful and impactful experience for all members in the crypto community.

Shiba Lite Roadmap

Phase 1 ✓

- Launch Smart Contract ✓
- Exchange Listing ✓
- CoinMarketCap Listing ✓
- CoinGecko Listing ✓

Phase 2 ✓

- Launch LiteGuys NFTs ✓
- Launch Staking on LBank ✓
- Launch PTE Beta ✓

Phase 3

- Launch PTE Game ETH and BSC
- Launch NFT Marketplace
- Launch DEX and Staking

Phase 4

- TBD
